QGIS • ArcGIS • projections • topology
- **Spatial analysis**
Overlay • network • terrain • PostGIS
- **Remote sensing & image analysis**
LULC • indices • change detection
- **Drone data processing**
Photogrammetry • ortho • DSM/DTM

What you finish with

- ✓ **A portfolio**, not just a pass — three assessed projects reviewed the way we review client work.
- ✓ **An internship certificate** that names the project, the tools and the tasks you were responsible for.
- ✓ **Placement support** — CV review, interview practice, and introductions where we can make them.

WHO IT'S FOR

Final-year students

Civil, geoinformatics, CS, geography

Working professionals

Switching in from an adjacent field

Recent graduates

A degree, but nothing to show yet

Corporate teams

On-site or online, scoped to your stack

HOW IT WORKS

- 1 **Talk first.** A short call to find the right track.
- 2 **Cohort.** Small groups, real data, supervised lab work.
- 3 **Project.** Three assessed builds for your portfolio.
- 4 **Internship.** Optional placement on a live project.

Ask about the next cohort

Tell us where you're starting from — we'll tell you which track fits, or if none of them do.
